PLASYS24

2–4 October 2024 | Rhodes, Greece

Call for papers

We invite you to contribute to the upcoming Global Plastic Pollution Symposium, PLASYS24, taking place from 2nd to 4th October 2024 in Rhodes, Greece, convened by the University of Leeds (UK) and the University of the Aegean (Greece). PLASYS24 is supported by Global NEST, featuring over 30 years' experience on environmental science and technology conferences.

PLASYS24 is a three-day symposium on plastic pollution where we gather to advance our collective understanding of this pressing challenge. We reimagine the format of the conventional scientific conference via a new interactive forum approach, exploring preventative and circularity solutions to eliminate plastic pollution.

Join us on the UNESCO World Heritage Island of Rhodes to hear and debate the latest developments in science and engineering. Together, through inter-disciplinary and systems approaches, we can inform the science-policy interface and strengthen the evidence base for a successful Plastics Treaty.

By submitting your paper and completing your registration before 10 May 2024, you can take advantage of our Early Bird Registration benefits and ensure access to discounted [registration fees](#).

IMPORTANT DATES

10 May 2024

Early-bird registration deadline

20 June 2024

Paper submission deadline

Delegates are invited to share breakthroughs across the plastics lifecycle, including research that incorporates economic activity; environmental media (water, land, air) and the sources, transportation pathways and fates of plastic pollution at multiple scales (nano to planetary).

Click [here](#) for detailed submission guidelines and to submit your paper. Should you have any questions or require further assistance, please do not hesitate to contact us at plasys@plasys.earth.

PLASYS24 THEMATIC AREAS AND SCIENTIFIC TOPICS

Sustainable plastics production and consumption

Human – environmental health and plastics

Just transition: baselines and futures

Science-policy interface

Emissions, sources, pathways, receptors, transformations

Plastics circularity

Financing targets and mechanisms

Measurement, modelling, monitoring & methods harmonisation

SUBMIT YOUR PAPER
